

Dedicated to the difference

AllSet⁺™ Gold SSP Kits

- Obtain a higher level of resolution with fewer ambiguities
- Select from multiple software interpretation options (including SCORE™ analysis)
- Reduce labor—includes dried, predispensed primer mixes, pre-aliquoted buffer, and a negative contamination well for each test

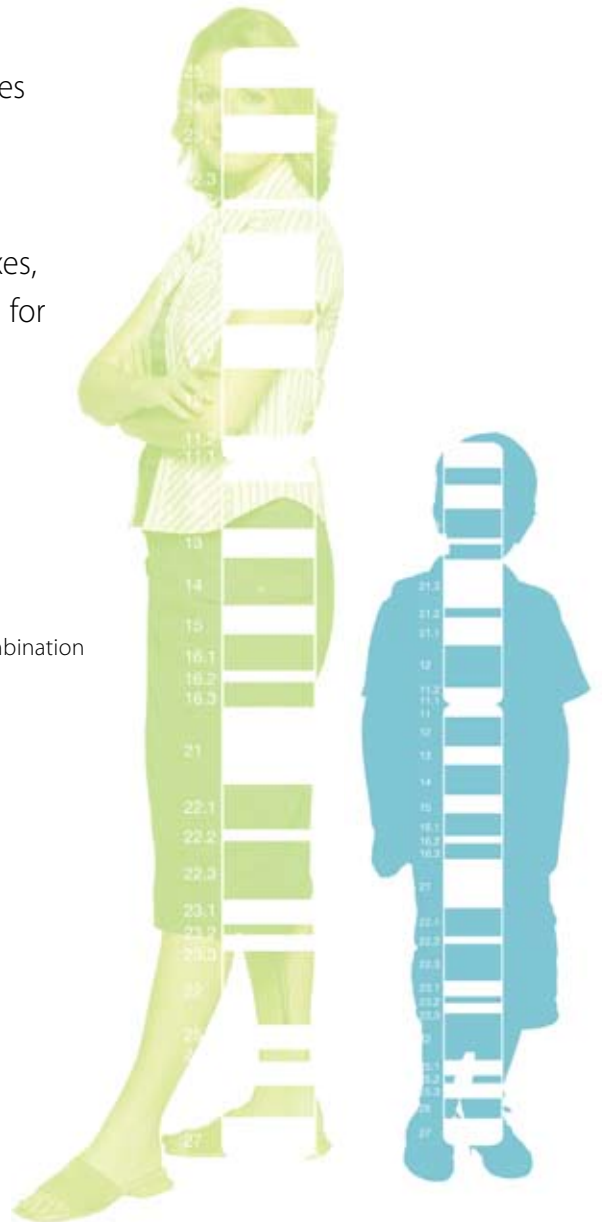

Kits available in the *AllSet*⁺™ Gold format include:

- Direct to high-resolution typing kits for all HLA loci
- High-resolution typing kits for all HLA class I loci
- Low-resolution typing kits for HLA class I and class II loci, including combination plates for ABC, ABDR, ABDRDQ, and DRDQ
- High-resolution typing kits for HLA class II loci

A free copy of UniMatch® Plus software is available for all *AllSet*⁺™ Gold SSP customers. Request Cat. no. A10286.
